1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Gerald Kita on 01-18-06.

5. (Currently Amended) A voltage-controlled oscillator comprising:

a plurality of inductively coupled inductor elements;

a first varactor element connected in parallel with a first of said inductor elements, said varactor element comprising serially-connected first and second same-type varactors, each having a well side and a gate side;

first means for applying a first tuning voltage to a node common to the first of said inductor elements, and for applying said first tuning voltage to said gate-side of each of said first and second same-type varactors;

second means for applying a ~~second tuning voltage~~ a bias voltage to a node common to said well-sides of said first and second same-type varactors; and

a second varactor element connected in parallel with second of said inductor elements, said second varactor element comprising serially-connected same-type third and fourth varactors, each having a well side and a gate side; and

third means for applying ~~said second voltage~~ a second tuning voltage to a node common to said third and fourth varactors, and at said well-sides of said third and fourth varactors.
